Skills

Languages

Java, JavaScript/HTML5/CSS, SQL

Tools

Git, Linux, Docker, Maven, AWS (RDS EC2), NodeJS, ReactJS

Projects

Present

Discord Music Bot

<https://github.com/Raikuman/TroubleClub-Radio> 

- I developed a bot for the popular chat service Discord using **Java** which is deployed on a local Windows server.
- Using the **JDA (Java Discord API)** library, the bot regularly interacts with users on the Discord client.
- Serves audio from YouTube and stores user playlist data in an **SQLITE** database, encrypting any user data at rest (via AES).
- Utilizes a common bot library I developed and maintain on **JDA** feature updates.

2021

Full Stack eCommerce Website

<https://github.com/Raikuman/comp380-commerce-website> 

- I led full-stack development for an **agile** team on an eCommerce website in **Java** and **JavaScript**.
- Created a backend for frontend built with **Spring** and used **AWS RDS** as a database.
- Built the frontend using **Vue.js** and **SASS**.

2024

TTRPG Tool Website

<https://github.com/Raikuman/TroubleClub-Writer> 

- I developed a website for writing story interactions for a custom Discord chat bot using **HTML5**, **JavaScript**, and **CSS**.
- Built the frontend using **TailwindCSS**.
- Created user interactivity with **JQuery** and **JQuery UI**.

Experience

2018 – Present

Freelance Web Developer/Designer

- Developed and maintained simple **HTML** and **JavaScript** websites for customers.

Education

2019 – 2023

BS in Computer Science

California State University, Northridge
